## FINTECH

FINANCIAL TECHNOLOGY

ACCA

Financial technology (better known as FinTech) is used to describe new technology that seeks to improve and automate the delivery and use of financial services. Financial Technology (FinTech) is here – sweeping through finance and, if some are to be believed, threatening traditional edifices that have stood for centuries.

For professional accountants, this new terrain will provide many opportunities as it permeates deeper and deeper into the fabric of society. From the promise of block chain, to the demands of valuation in a digital era, finance more than ever needs an experienced, knowledgeable guide to make the most of the opportunities ahead

### PROGRAMME HIGHLIGHTS:

- A blend of Financial Technology – Artificial Intelligence (AI), Machine Learning, Robotic Process Automation (RPA) and intelligent automation which is the need of the future.
- Develops skills to modify, enhance, or automate financial services for businesses or consumers.
- Focuses on Investment management and decision-making models for those in the finance industry.
- Industry designed curriculum that delivers technical excellence and supplements professional skills.
